

## Obtaining the PV INFO File

The PV\_INFO file contains vehicle-specific data needed for custom tunes.

1. Connect PV3 to Vehicle:
  - Locate your vehicle's diagnostic port (consult your vehicle's manual or Dynojet support if unsure).
  - Plug the PV3 into the diagnostic port.
  - Turn the vehicle's ignition/power switch ON (do not start the engine).
2. Retrieve PV INFO File:
  - Turn the ignition OFF and unplug the PV3 from the vehicle.
  - Connect the PV3 to your computer via USB.
  - Open File Explorer; the PV3 will appear as a removable drive (e.g., "POWERVERSION").
  - Navigate to the PV\_INFO folder and locate the PV\_INFO.txt file.
  - Copy this file to your computer (e.g., desktop) and send to a PPEI via your support ticket.
